

# *Instructions:* **PIPE CLEANER ROSE RING**

1. You will need 4 regular-sized pipe cleaners (these do not have to be the same colors - allow for creativity!) and 1 half-sized green pipe cleaner.
2. Line up the four long pipe cleaners, and fold them into a U-shape.
3. Place your ring finger into the bottom of the U-shape, and twist the pipe cleaners around your finger to create a ring. Pull your finger out and widen the ring hole a little bit, tightening up the twist, if needed.
4. Fan out the long straight pieces of pipe cleaner and slowly roll each one into the center. There is no wrong way to do this. Simply roll them up until they are in the center.
5. Once all of the pieces are rolled into the center, position them however you would like to in order to create a rose-look.
6. Wrap the green pipe cleaner around the neck of the rose ring, and twist it to keep it attached.
7. Roll the two sides of the green pipe cleaner toward the center in order to create two leaves.
